

Installing the Vinyl screen Track with retaining clip

- Place the Vinyl track tight against the head of the window on the exterior.
- Secure in place using ½” Galvanize Staples
 - Approximately 2” from each end and 12” apart thereafter.

Installing the Aluminum Retainers and Retainer screws

- Place the screen in the window, insure that the top of the screen is in the vinyl track at the top and the bottom is setting in the correct location.
- To install the retainer screw, hold the retainer clip and predrill a hole in the sill inside of the retainer clip.
- Place silicone in the threats of the screw.
- place the screw in the predrilled hole and screw in place. No not screw the screw all the way in leave at least 3/8” up so the retainer clip can be removed if needed by the homeowner.
